

MANUAL PLANETARY POLISHER

CHARACTERISTICS

CT-1 is a manual planetarium ideal for smoothing and polishing counters, stairs, tops and small surfaces. Thanks to the powerful motor and the sturdy counter-rotating planetary it is possible to work on marble, granite and concrete.

CT-1 stands out in the manual sander market for its sturdiness and perfect balance. The speed of the abrasives and the counter-rotating movement has been studied to make the machine stable, making the operations simple and not tiring.

CT-1 is equipped with a splash guard and dust conveyor. Thanks to the insertion of the handle rod it is possible to transform the CT-1 into a complete machine also for:

- Sanding and polishing stairs, landings.
- Sanding and polishing marble, stone and concrete floors.
- Sand and smooth the parquet.
- Brush and antique marble, stone, wood
