

GRINDING MACHINE

CHARACTERISTICS

ST GRIND3 is a very compact and performing three-phase grinding and polishing machine equipped with mono-directional fully geared planetary and variable working speed. It's the ideal machine for large marble, granite and concrete surfaces and for the preparation of industrial floors, bush-hammering, grinding, fast removal of old glues and resins and mirror-polished concrete.

MAIN FEATURES

Single-shell framework, robust and compact for less space. Easy removal of the planetary that allows the use of discs, brushes, 21" tools.

180° overturning system for extra weight.

46 litres water tank.

total mechanical transmission with thermoset gears for maximum reliability and durability.

TECHNICAL DATA

MOTOR	DRIVE INVERTER	VOLTAGE	FREQ.	INTENSITY	RPM	WORK DIAMETER	TOOL SIZE	DIMENSION
(HP)	(kW)	(V)	(Hz)	(Amp)		(mm)	(mm)	(cm)
7	7.5	380-480	50/60	16	300-1300	530	3x240 1x530	120x100x55
7.5	11	220 - 1/3 phase	50/60	30/20	300-1300	530	3x240 1x530	120x100x55
